| Learning & Development

Pathway Programs

Our 12 month Graduate Academy aims to create an optimal environment for a Graduate's clinical and personal development.

The structured curricula provides supervised support throughout onboarding and vital early on the job experience, as well as professional and well-being support, with the greater purpose of creating a strong community for Graduates and their Clinics in the VetPartners family.

VetPartners Aspiring Clinical Leader Development Pathway is a 12-month program, designed to accelerate your skills and knowledge as an aspiring lead veterinarian.

The program includes key modules on finance & commercials, along with leading other people, relationship management, operations and career coaching to provide a future ready pathway for lead veterinarian opportunities.

The Clinical Leader Commercial Skills program is a targeted toolkit for improving the commercial acumen skills of Clinical Leaders. You'll learn essential financial acumen skills, including understanding and interpreting financial performance from a profit and loss statement. You can use this knowledge to critically analyse revenue, COGs and labour costs to identify improvement areas and develop strategic plans to strengthen your clinic's financial performance

The Ignite Regional Manager Development Pathway is designed to enhance the proficiency of Regional Managers across essential competency areas. Learning spans commercial, financial and operational skills as well as influence and leadership. This strategic approach ensures that our Regional Managers are equipped with the essential tools and capabilities, optimizing their opportunities for success.

Support Programs

Our 8 Veterinary Training Centres (VTCs) across ANZ are dedicated to Elevating and updating the skills and knowledge of veterinary professionals. The VTCs provide a safe & supportive learning environment where individuals can learn and practice in a small group environment. As a VetPartners employee you'll enjoy free access to workshops.

The Leadership Academy is a leadership development program designed to develop confident and inspiring Veterinarians (both aspiring to lead others & enhancing current leadership) that bring together strong and effective teams, achieve business success and reach your leadership potential. The Emerging Leaders stream of the Leadership Academy also provides a learning and development pathway for aspiring clinic team leaders to build capability and confidence in key leadership and people skills.

Digital learning library of over 200 clinical and non-clinical courses. You'll have access to online learning courses on a wide range of topics and special interest areas. This digital learning library is available on demand and on the go from your laptop, tablet or mobile device.

A career for life

GP Vet

Year 1

"I'm very excited to have started as a new graduate at this clinic. I have great support from an in clinic mentor Dr Lisa, as well as being able to connect with many graduates on the same path as a new graduate through the VetPartners New Graduate academy.

I am looking forward to a great year of learning and taking advantage of 2 weeks paid study leave, as well as some practical workshops through the Vet Training Centre."

Year 5

"Having worked for 5 years as a veterinarian, I am now quite interested in surgery, and VetPartners has organized a transfer to a bigger busier clinic with a high surgical caseload!

I'm really enjoying the surgical challenges. Plus, I have organized to spend a day a month watching a surgery specialist at one of our Specialist centres, and always leave feeling inspired!"

Year 7

"I have now been a vet for 7 years, and handle a lot of the surgical cases in the practice. I have also developed a reputation as a 'regional expert', and take referrals from some of our neighbouring VetPartners sites.

I was asked by my veterinary manager whether I wanted to consider specialising in surgery and joining a program at one of our specialist sites, but I've decided that I want to be a leader in my clinic, and therefore have enrolled in the ACCELERATE program run by the L&D department for aspiring leaders."

Year 10

"It's hard to believe that I celebrated 10 years in the profession the other day! I am now an established clinical lead vet in my practice, and work closely with our vet manager who gives me coaching, mentoring and advice in effectively running the day to day operations.

After what seems like a lot of learning and development, I am relishing the opportunities to give back to my team and watching my younger vets go through the same stages in their career as I have had."

A career for life

Specialist Vet

Year 1

"I'm very excited to have started as a new graduate at this clinic. I have great support from an in clinic mentor Dr Lisa, as well as being able to connect with many graduates on the same path as a new graduate through the VetPartners New Graduate academy.

I am looking forward to a great year of learning and taking advantage of 2 weeks paid study leave, as well as some practical workshops through the Vet Training Centre."

Year 3

"I now have 3 years of experience, and I've just been accepted into an internship at a specialist centre! I am keen on pursuing a path to specialisation, but am not yet sure on which speciality I want to focus on, so this 12 month rotating internship allows me to be a part of the action in each department and get a sense of what really pushes my buttons!

I am so excited to be working with some of the world's leading specialists, as well as having colleagues who are in different phases of the career path that I am now embarking on"

Year 5

"It has been one year since I began a residency! The opportunities that I have had to learn off some of the group's leading eye specialists has been a steep but well supported learning curve.

I am also lucky to have colleagues embarking on residencies in medicine, surgery and oncology, who I can trade notes in regards to their experiences, as well as having a connection with a community who know what I am going through. Its hard work, but very much worth it!"

Year 7

"Its with great pleasure to let everyone know that I have passed my examinations and am now a boarded specialist! Well before beginning preparations for my examinations, VetPartners spoke to me about how they can best support my studies and the lead up to the examination; I greatly value and appreciate the opportunities that were given to me and the learnings I absorbed through different specialists in our network, outside of the hospital that I work in.

I also had ongoing employment organized so that I could solely focus on the exam, and know that I will continued to be looked after once it was finished"

Year 10

"I am now a department leader in my area of specialty. I work closely with other departments, as well as our leadership team to ensure that we are contributing to the healthy running of our specialist hospital. We are all very passionate about great standards of care, but also in teaching and mentoring, and we are training two residents towards specialisation.

They remind me of my own journey 5 years ago, and I am committed in giving back to them as much as I can, and to be a positive part of their career pathway. And with VetPartners support, our training program is continuing to evolve and better prepare tomorrow's specialists'

Our success stories

Veterinary Student

CAITLIN
Student and Nurse, 4Paws Vet

"It's great to get hands on training and experience with amazing vets while doing my studies. I am also excited for some of the opportunities that I have heard about offered by VetPartners, like the new grad academy as well as the structured mentoring support!"

New Graduate Veterinarian

DR CHRISABEL
Hurlstone Park Vet Hospital

"The mentoring I have received, both within the clinic as well as externally through the graduate academy, has been priceless and I am so grateful to have been able to kick start my career in such a supportive environment"

Recent Graduate Veterinarian

DR AMY
Allison Crescent Vet Hospital

"Its great to be able to work in a clinic that has retained its culture, team and heritage, yet be able to have access to learning programs and resources that can help me become the best vet that I can"

Veterinary Intern Specialist Pathway

DR RUDOLPH
Surgery Intern, Perth Veterinary Specialists

"I'm excited to have the opportunity to begin my specialty training with VetPartners, in particular looking forward to having exposure to intel from other experts outside of my clinic here in Perth, to learn and develop my skills"

Experienced Veterinarian GP Pathway

DR CLARA
Canberra Vet Hospital

"I started working for Vetpartners as a new graduate, working in mixed practice. I have been impressed by the focus on career development and by the resources and support available to help develop clinical skills, both as a new graduate and as a more experienced clinician"

Resident Veterinarian Specialist Pathway

DR ALBERT
**Oncology Resident
Perth Veterinary Specialists**

"Its great to be able to do my specialist training in an organisation that will give me ample opportunities to practice all over Australia once I have become boarded"

Senior Veterinarian GP Pathway

DR LISA
**Clinic Director
Gladesville Vet Hospital**

"Working in a VetPartners clinic has allowed me to build and lead our own clinic with autonomy, but at the same time given me ample clinical, business and leadership support"

Specialist Veterinarian

DR KERRY
**ECC Specialist
North Shore Vet Hospital**

"I manage the urgent and critical patients of our hospital. Its great working for a specialist hospital with a great culture and with the back office support of the broader VetPartners operations team"

Non Clinical Veterinarian

DR MEG
Veterinary Manager NZ

"Each role I've had within VetPartners has been so rewarding in its own right, and my current role offers variety, flexibility and the opportunity to help different clinic teams improve their service delivery and job satisfaction"

Find your fit - with support to pursue special interests in GP

Each GP clinic in the VetPartners network is unique. We can help align you with a clinic that's perfect for you, with the right equipment and team to support your areas of special interest.
